

⚡ Alpha Blitz

Tagline:

Start with fragments. Build with strategy. Win with words.

Game Overview

Alpha Blitz is a fast-thinking word-building game using magnetic tiles made of letters and bigrams (two-letter combos). Players begin with five random fragments and take turns adding tiles to form valid words. The goal: build the longest and most creative words possible.

How to Play

Setup

- Each player receives **five random fragments** (letters or bigrams).
- Place them on your magnetic board or play surface.
- Keep the rest of the tile pool face-down or in a draw pile.

Gameplay

1. **On your turn**, draw one new fragment from the pool.
2. Use your current fragments to **build or extend** a valid word.
 - You can rearrange your fragments freely.
 - Words must be at least **three letters** long.
 - You may use **bigrams** as single units (e.g., “TH”, “ER”, “IN”).
3. If you form a valid word, **score it** and set those tiles aside.

4. If no word is formed, keep the new tile and try again next turn.

Scoring

- 1 point per letter in a valid word.
- +2 bonus points for using a bigram.
- +3 bonus points for words longer than 6 letters.

Winning

- Play until all tiles are used or a set number of rounds is complete.
- The player with the highest score wins!
